SUMMARY

Recent Computer Engineering graduate with a solid foundation in computer networks, network infrastructure, and computer architecture. Experienced in staging and configuring network equipment for B2B clients and performing preventive maintenance documentation. Deeply interested in understanding complex systems and seeking to apply a technical engineering mindset to drive efficiency in a dynamic IT team.

SKILLS

Networking & IT Infrastructure

- Certifications & Tools, MikroTik Certified Network Associate (MTCNA) with proficiency in foundational network administration and terminal-based management (PuTTY).
- Network Operations & Staging, executed staging and pre-configuration of enterprise-grade hardware, ensuring strict compliance with B2B technical specifications before deployment.
- Maintenance & On-Site Support, provided direct on-site troubleshooting at client premises to resolve network disruptions, alongside performing regular Preventive Maintenance (PM) and documentation.

Linux, IoT & Embedded Systems

- Linux Administration, proficient in Command Line Interface (CLI), file system management, and network troubleshooting on Debian-based systems (e.g., Raspberry Pi/Ubuntu).
- SBC & Edge Deployment, hands-on experience with Raspberry Pi integration of image sensors for real-time processing within Linux environments.
- Hardware Acceleration, designed and implemented ANN (Artificial Neural Network) accelerators on SoC architectures using FPGA.

Hardware & Architecture

- IC Design & Verification, digital and Analog VLSI concepts using Cadence Virtuoso Layout Editor.
- System Design, ASIC & FPGA development utilizing Verilog/SystemVerilog, Xilinx Vivado, and ModelSim.

Software Development

- Web Development & Hosting, responsive frontend design (HTML/CSS), web hosting management, and deployment.
- Frameworks & Tools, basic proficiency in React, Python, PHP, MySQL, and collaborative workflows using Git/GitHub.

EDUCATION

Bachelor's Degree in Computer Engineering, Andalas University **Padang, Sumatera Barat**
2021 - 2026

- GPA: 3.66
- Relevant Skill: Network Engineering, Computer Vision & IoT, Embedded Systems, Computer Architecture, VLSI Design.

EXPERIENCE

Packet Systems Indonesia, Network Engineer Intern (Post-Sales) **Jakarta Selatan, Jakarta**

Jan 2024 – Feb 2024

- Executed network staging and pre-configuration for enterprise-grade hardware, ensuring technical compliance before delivery to B2B clients.
- Managed device access via Linux-based terminal and updated Preventive Maintenance (PM) documentation to ensure system reliability and minimize hardware failures.
- Collaborated with the engineering team to verify equipment functionality and troubleshoot initial configuration issues.

PT Hartono Istana Teknologi (Polytron), IC Design Engineer Intern **Kudus, Jawa Tengah**

Sep 2024 – Dec 2024

- Collaborated on the design and verification of Integrated Circuits (ICs), focusing on Digital and Analog VLSI concepts.
- Utilized Linux-centered EDA tools to develop ASIC and FPGA solutions, bridging the gap between theoretical computer architecture and industrial semiconductor application

CERTIFICATION

- **MTCNA**
MikroTik Certified Network Associate
Mikrotik
Number: [2510NA5830](#)

LEADERSHIP & ORGANIZATIONAL ACTIVITIES

Equipment Division Coordinator, CORE3D Committee Jan 2024 - May 2024

- Led the Equipment Division by coordinating a dedicated team to manage logistics, hardware inventory, and technical infrastructure for the event.
- Ensured the seamless setup and configuration of audio-visual and supporting equipment, guaranteeing operational reliability and zero downtime during critical event phases.
- Managed asset procurement and distribution strategies to maximize efficiency while minimizing equipment loss or damage.

Staff of Human Resources Development, BEM KM FTI Jan 2023 - Dec 2023

- Executed strategic capacity-building programs designed to enhance the soft skills, leadership qualities, and technical potential of Information Technology students.
- Facilitated internal training (upgrading) and bonding activities to foster a solid organizational culture and maintain high member engagement.
- Collaborated with the department team to successfully organize student development seminars and workshops for the faculty community.
